## Introduction of My Department

### Bio-industrial Mechatronics Engineering

It blends engineering with biological sciences, focusing on automation, machinery, and biosystems. Facilities include extensive laboratories and specialized centers for research and practical applications.

The screenshot shows the official website of the Department of Bio-industrial Mechatronics Engineering. It features a banner with the department's name and a photograph of the building. Below the banner, there is a detailed description of the department's history, current programs, and facilities. It mentions that the department was formerly the Department of Agricultural Machinery Engineering, established in 1981, and evolved from one of the two divisions of its predecessor, the Department of Agricultural Education. The department offers programs leading to B.S., M.S., and Ph.D. degrees. Graduate programs began in 1991 and 1994, respectively. The departmental building has over 9,900 square meters of space, housing classrooms, teaching and research laboratories, and the Agricultural Machinery Workshop and Agricultural Automation Center. Areas of study include bio-industrial automation engineering, bio-industrial machinery engineering, biological systems engineering, biomaterials processing engineering, bioenvironmental control engineering, aquaculture, and more.

### WAESCO LAB

Innovative researcher at Energy Efficient System Development Laboratory. Expertise in sustainable farming, precision agriculture, and automation. Developing solutions to reduce environmental impact and boost productivity. Skilled in integrating renewable energy, smart sensors, and data-driven decision-making for resource conservation and efficiency.

## Introduction of My Department

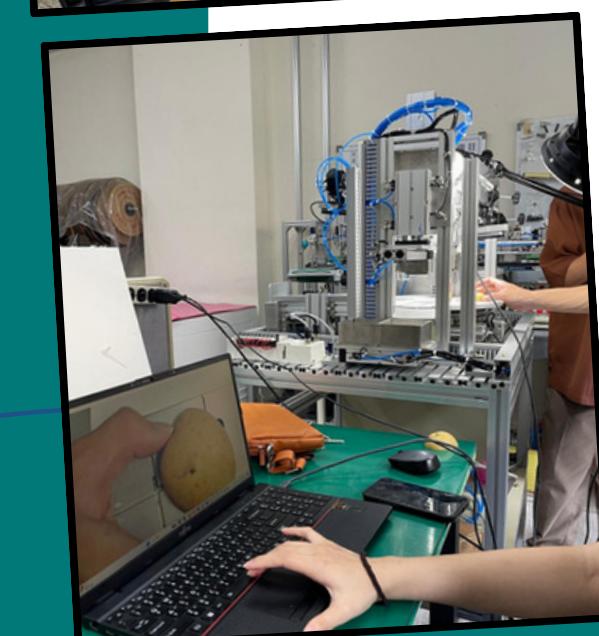

### Teknik Mekatronika Bioindustri

Fakultas ini memadukan ilmu teknik dengan ilmu biologi, dengan fokus pada otomatisasi, permesinan, dan biosistem. Fasilitasnya ada laboratorium yang luas dan pusat-pusat khusus untuk penelitian dan aplikasi praktis.

The Department of Bio-industrial Mechatronics Engineering assumed its present name in the Fall of 2002. It was formerly the Department of Agricultural Machinery Engineering, established in 1981, and evolving from one of the two divisions of its predecessor, the Department of Agricultural Education. The Department of Bio-industrial Mechatronics Engineering offers programs leading to the degrees of B.S., M.S. and Ph.D. Graduate programs for M.S. and Ph.D. began in 1991 and 1994, respectively.

The departmental building has a total floor space of over 9,900 square meters. In addition to classrooms, teaching and research laboratories, the building also houses the Agricultural Machinery Workshop and the Agricultural Automation Center.

Areas of study include bio-industrial automation engineering, bio-industrial machinery engineering, biological systems engineering, biomaterials processing engineering, bioenvironmental control engineering, aquaculture, and food processing engineering.

### LAB WAESCO

Peneliti inovatif di Laboratorium Pengembangan Sistem Hemat Energi. Keahlian dalam pertanian berkelanjutan, pertanian presisi, dan otomatisasi. Mengembangkan solusi untuk mengurangi dampak lingkungan dan meningkatkan produktivitas. Terampil dalam mengintegrasikan energi terbarukan, sensor pintar, dan pengambilan keputusan berbasis data untuk konservasi dan efisiensi sumber daya.

## The Experiences Gained during My Study at NCHU

### IPC EVENT

IPC presents events such as welcome parties and others, which can gather international students and local students to socialise and get to know each other in an event that is created.

### Exhibition

Each department in NCHU makes an exhibition to introduce its department that is interesting and can be visited by everyone.

### Tea Trip OIA

On this trip, OIA introduced tea making and the types of tea in Taiwan. This trip was attended by international students, so that it could add new friends and insights into tea.

### English Summer Camp Volunteer

This activity is located at a junior high school in Nantou. Students as English teachers with a curriculum that is designed as interesting and fun as possible. You can get a very extraordinary experience in this event.

## The Experiences Gained during My Study at NCHU

### ACARA IPC

IPC menghadirkan acara seperti penyambutan yang dapat mengumpulkan mahasiswa internasional dan mahasiswa lokal untuk bersosialisasi dan mengenal satu sama lain dalam sebuah acara yang dibuat.

### Pameran

Setiap departemen di NCHU membuat pameran untuk memperkenalkan departemennya yang menarik dan dapat dikunjungi oleh semua orang.

### Perjalanan Teh OIA

Perjalanan ini menunjukkan pembuatan teh dan ragam teh yang ada di Taiwan. Diikuti oleh mahasiswa internasional, sehingga dapat menambah teman dan wawasan baru mengenai teh.

### Relawan Kemah Musim Panas Bahasa Inggris

Berlokasi di sekolah menengah pertama di Nantou.

Mahasiswa sebagai guru bahasa Inggris dengan kurikulum yang didesain semenarik dan semenyenangkan mungkin, kamu bisa mendapatkan pengalaman yang sangat luar biasa dalam acara ini.
