

New Normal Life

National Chung Hsing University is a famous university for agriculture. Inside the campus is shady with many trees. There has a big pond inside the university, it is a famous place for students and guests who want to enjoy nature, duck and goose.

My School Life in the new normal era, after covid-19 it coming everything in the world has changed. From the normal life to the new normal life. In my adjustment, every day of new normal life the important thing of us is the mask. At first, I thought it was strange and difficult, but after doing it for 2-3 weeks it becomes a part of my life. In National Chung Hsing University have a community of international student, it makes me can find the new connection from another country and make me not lonely. In NCHU also have the good OIA to help and support the international student. Our OIA of NCHU are also provided scholarships to help and support international students especially in covid-19 the duration OIA will provide the important news of covid-19 in Taiwan to foreign students it helpful for us to update the information.

New Normal Life in Our School

In the covid-19 era, I think the Taiwan government was very good to control the situation. Taiwan lockdown the city for around 3 months and Taiwan can control the covid-19 in their country. In my university, they can control the people who not the student and staff of NCHU cannot come inside the university. Inside the university when you want to come inside the building you need to check the temperature before going inside the building. The Taiwan government provides the vaccine to protect the foreign students from the covid-19. Everything the Taiwan government and NCHU do can protect us, make me and a foreign student safe in Taiwan.

In the last part, am hopeful the bad situation will pass soon and everything will come back to normal. Recommend for those who will come to study. At this university have both good stories and the unexpected things that happen every day, prepare yourself, prepare your mind and prepare your money. Of course, there must be adjustments in different places, different languages, different cultures, but we can be friends. Stay strong we will pass it together.

“Good times become good memories and bad times become good lessons”

*Good Times become Good Memories and
Bad Times become Good Lessons.*
