

Spring: The Season of Change

Everyone has a story to tell, mostly experiences that left an impression in their lives. Whatever stories it may be, all people have a breaking point in their lives. Student life is the highlight of almost every people. School is the beginning of a child's life in which enhancing skills, creating goals, able to spot their potentials, and even become someone better than they were before, happens. Life in school is a turning point for everyone's career in life, and NCHU is my turning point.

It was the season of spring when I first started college. I'm a freshman student up until now in International Bachelor Program of Agribusiness (IBPA), an English-taught major suitable for students who'd love to study about handling agricultural business. Of all the countries in Asia, Taiwan is one of the developed countries that provides excellent education system. Based on my research, NCHU was first founded as Advanced Academy of Agronomy and Forestry which specializes in Agricultural Sciences. I chose to study in NCHU since it is one of the most prestigious universities in Taiwan, in which it excels in agriculture.

Most of the facilities in NCHU are using the modern technology that can support the students to excel in class. One of these facilities is; the library in NCHU, it is very spacious and is filled with a lot of knowledgeable books. Everything is well-organized which gives the peaceful surroundings, the students need to focus. The gym is enormous and almost all sport fields are found there. There's also an open space for the sportsmen and sportswomen besides the gym, and multiple basketball courts around. What I like about NCHU, the school's open for everyone to go to, for example, there are a lot of old people who do some exercises in the campus every morning, some adults riding a bike and jog around the campus. The campus have a lot of trees everywhere, it's clean and have a healthy environment for everyone, symbolizing preservation of the natural environment.

NCHU is well known for providing a lot of opportunities to students, as well as supporting the students' future, like internships and exchange student to various countries associated with Taiwan, scholarships, and job opportunities. The OIA provides scholarship to International students to help them with the finances, and provides teaching assistant for students to apply if they are having a hard time with their finances in Taiwan. OIA have a lot of events that involves with interaction of different races which strengthens the bonds between International students and Taiwanese students.

Studying in NCHU, offers a lot of opportunities that International students can acquire for the goals that they want to reach. The development of skills, knowledge, achievements, abilities, and hobbies are at a matter from here on. Like what an anonymous person said, "In this school, we don't do easy. We make easy happen through hard work and learning."
